MarketWatch (press release)

Celeno's OptimizAIR(TM) technology will help Amino offer whole home Wi-Fi networking robust enough for HD IPTV distribution, multi-room DVR and Over the Top (OTT) video and Video on Demand (VoD) consumption anywhere in the home.

Ten... IPTV set-top boxes

Register

The smart TVs popularised by Samsung and others are the focus of this but you don't need to shell out on a new telly - a cost-effective IPTV box can do it too. IPTV means the delivery of TV shows and films over broadband. It can include live channels ...

Probe Detects, Corrects Video IP Errors

Communications Technology

Sencore is offering a new tool for the video technician: a Web-based probe blade for monitoring and troubleshooting 10 GbE IP networks in large cable, IPTV ...

Strong TV gains for KPN

Broadband TV News

Dutch incumbent telecom provider KPN said it has added 84000 new customers to its IPTV service during Q4. The total number of TV customers stood at 1.4 million at the end of December, 2011. Markets here of the company now stands at 17% versus 15% at ...

Telly makers failing to turn punters on to smart TV

Register

Even if smart TV ownership doesn't increase, there's clearly an interest in IPTV. YouGov found that games console ownership "saw a big uplift" over the Christmas period. All of the current consoles can access one or more net TV services.

Celeno chips in for Amino for connected IPTV STBs

Rapid tv news

The move is part of Amino's recently announced strategy that it would enhance its entire IPTV product range with OTT capabilities to deliver a richer, more dynamic entertainment experience for consumers. All of the company's boxes are designed to ...
