How Multicast Will Improve NBN Video Services

Lifehacker Australia

"It makes the network efficient for IPTV services, and means providers can potentially build-up triple-play bundles very easily." Because the content is distributed directly to the POIs, backhaul costs are cheaper. Bundling isn't a new development; many ISPs ...

TPG's unlimited data plans on NBN will stimulate competition, NBN Co says

Computerworld Australia

NBN Co today launched its Multicast feature on the NBN, which allows service providers to broadcast IPTV channels on NBN points of interconnect (POI), with each POI streaming around 150,000 homes. NBN Co is hoping the feature is not only used by ...
